tower bombarde. brainstorm tower bombarde

It's just bad.

You just kinda of jitter around levels. Clunky as crap controls.

ALL the baked on lighting.

Another quality game brought to you by Unity.

Also the community for this game is weird AF. Its like a group of 12 year olds. So lame.. Even For its cheap price I cant recomend this game. Gets boring really fast and it's extremely repetitive.. A repeat of the original A.R.E.S. with Tarus being the big hit of this one! The music is far out. Making me believe that there is a Japanese way that Sonic the Hedgehog has not attain yet and thank you!. I can't recommend this game. The puzzles are either too simple or make almost no sense. The little story addition is lame and wastes time. Very little to interact with and the things you can are often annoying to grab.. Not the best game ever made, but you can have loads of fun with it - If you like Indiana Jones and LEGO this will be a blast. Even though it could use some patches to correct a bug or two, the gameplay is still pretty good. I recommend it!. Needs to add support for smaller rooms... buuttttt its fun. I do not reccommend this game. The idea for this game was great, the features promised was nice, but in the end the game didn't hold up to what it was offering. The play value was short, and honestly, you just lose your interest after awhile. If you like music games I would rather recommend Audiosurf.. wish i could get my money back,,,,. You can't get past the tutorial. There is no joystick support either. Do not buy this game.

---

This game literally hurts my eyes to look at. No to mention the grammar is sub - par. If the prompts and dialogue were written by a native english speaker, I'd be highly suprised.

The poorest xcom clone ever.. The game runs fine with i7 and 1070. Visually it is beautiful, everything thing else is... bad. The butterfly time is cool, but that beep is rough.

There is the little helper bot, but if you don't look exactly at him the whole time you can bearylly hear him. Also if you look away for too long he skipps all the dialog :(

Would play again when game is more complete.. some of my absolute favorite tables, literally thousands of hours of gameplay here for real.

. Yep, another decent hidden object game from Artifex Mundi. The puzzles in this one require some lateral thinking. \*\*\*. the best Call of Duty DLC, total 6 maps 4 for multiplayer and 2 for the Co-op special ops worth the 15\$
